Powder Booths

> **Non-Recovery**

> **Cartridge System (Powder Collection)**

> **High Production Systems**

GFS POWDER BOOTHS

Non-Recovery Powder Booth are typically used in batch and low/medium production applications. This powder booth features an open-face design that incorporates a 3-stage filtration system and a high-capacity, low-noise re-circulation fan for maintaining a high-performance application environment.
FEATURES

- Heavy duty construction with white pre-coated galvanized steel panels
- Smooth interior for easy maintenance
- Designed to comply with OSHA, NFPA and NEC regulations
- High capacity, low noise plug fan, rated at 1.5" SP, allows longer filter usage
- 3-Stage filtration system
- Energy efficient light fixture(s) with inside access for easy maintenance
- Air replacement not required

COMPLETE PACKAGE

All booth systems are shipped with:

- Fan
- Electric motor
- Energy efficient light fixture(s)
- Filters and grids
- Manometer for filter maintenance
- Assembly hardware and drawings

Non-Recovery Powder Booths feature the 3-Stage Filtration System—easily accessible from inside the booth.

1st Stage Roll Media	2nd Stage Panel Filter	3rd Stage Bag Filters
Roll Media contains multi-layered polyester media. The air-entry side is constructed of a mixture of lofted denier fiber. The air-leaving side is comprised of a mixture of heavily needled media to densify. The air leaving side is jet-ink printed for identification and proper installation.	The panel is constructed of two different layers of tackified polyester media, sealed together so the tackified layers of each media touch in the center. A galvanized nine-gauge wire frame inside the panel touches the tackified sides of both media. The air-entry layer is constructed of multi-layered, multi-density polyester with a heavy, non-migrating tackifier on the air-leaving side. The air-leaving media is a heavily needled polyester, densified to 1/4" thick, tackified on the air-entry side.	The 6-pocket bag filter, is constructed of a composite of pre-filter, melt blown and spun bound polyester fibers. The pockets are sewn together on the perimeter with two heat seals, forming three air channels in each bag pocket. The bag pockets on the metal support is inserted into a galvanized metal header. The galvanized header contains an acceptable sealing agent inside of each header to eliminate the possibility of paint bypass within the filter.
Part No: 216-502 - 36" x 50' 216-503 - 45" x 50'	**Part No:** 216-501 - 20" x 20" x 1"	**Part No:** 216-505 - 20" x 20" x 12"

OPTIONS

- Conveyor openings
- Booth extensions
- Product doors
- Control panels

Notes:

- Motor HP, voltage and phase specific.
- CFM rating based on clean filters

GFS POWDER BOOTHS

Cartridge System/Powder Collection Booths are typically used in batch and low/medium production applications. This booth features a cartridge filtration system using the PC-100 module, which re-circulates clean, filtered air. The powder module includes a high-performance non-sparking fan, six high-efficiency primary cartridge filters, reverse pulse jet solenoids, and four final filters.

The deluxe control panel features a Photohelic pressure gauge that monitors pressure drop and initiates the high-velocity pulse of air that is automatically injected into each filter sequentially. This means that you change filters less often.

FEATURES

- White pre-coated galvanized steel panels
- Energy efficient inside access light fixture(s)
- Collector Module features high efficiency cartridge filters and air solenoid for filter maintenance
- Standard differential pressure gauge with a safety interlock for automatic shut down when air pressure exceeds its normal operating range

OPTIONS

- Fluidized bed for powder recovery (pump not included).
- Powder modules can be purchased separately
- Conveyor openings
- Booth extensions
- Control panel (UL listed) factory assembled, pre-wired and numbered with motor starter, fuse disconnect - on/off switch and a solid-state timer for adjustments of sequential pulse cleaning

PC-100 - Collector Module Only

Universal application with only one standard collector, featuring MAAVC (Manually Adjusted Air Velocity Controls).

- 5 HP direct drive, 3-phase 208/230-460V motor with non-sparking fan
- 6 cartridge filters with fast release mounting assembly
- 4 final filters for additional protection in the workplace
- The air supply requirements are 2.3 cfm @ 40 - 70 psig or 13.1 scfm, regulator not included
- Optional casters for either tracks or roll around

GFS POWDER BOOTHS

High Production Collection Booth (HPCB) are designed to increase productivity, product quality, and profitability. Often used in conveyorized powder coating application systems. Modular designs engineered for optimum airflow and maximum transfer efficiency enable GFS to efficiently produce powder systems ideal for any powder coating operation.

- Constructed of 18 gauge stainless steel panels for exceptionally long life.

- Self-cleaning cartridge filter collectors provide easy access to the filters for fast maintenance.

- Overhead filtration requires less floor space and features lightweight removable filter modules

- Optimum air control maximizes transfer efficiency and booth cleanliness and improves overall performance

- Unique hood design with angled corners inside booth for easy cleaning.

- Independent cartridge module complete with motor, fan and air solenoids with venturies designed to provide efficient air pulsation through cartridge filters.

OPTIONS

- Fluorescent lighting
- Central air manifold with required regulators
- 2 speed fan control with operating & cleaning modes
- Roll on/off track system
- Flame detection system

Custom designed booth openings such as operator shields and touch-up windows create a safe and efficient working environment.
FEATURES

Powder Booth

- 18-gauge 304SS canopy with 4B high-polish inside finish
- Smooth, tapered inside surfaces for easy cleaning
- Standard 2 foot long entrance and exit vestibules
- Transparent polycarbonate ceiling for a brighter application environment
- Adjustable-height leveling

Fan Module

- High-efficiency re-circulation fan
- High-efficiency final filters
- 120 volt air supply shut-off valve
- 1" diameter air line filter

Collector Module

- Cartridge filter collection for primary powder collection and reclaim
- Integral fluidized bed with high-capacity powder transfer pumps
- Self-cleaning pulse-jet filtration
- Casters that allow easy maneuverability for color changes
- Integral powder fill hopper

End Elevation

GFS PARTS & FILTERS

Full Service Parts and Filters Department

GFS' quest for product quality and performance has resulted in a full line of accessories that have been designed and manufactured for durability and long lasting, trouble-free service. Great emphasis is placed on our engineering and workmanship so that GFS customers will receive the best products at competitive prices.

- Filters (all Makes & Models)
- Electrical Components
- Oven Components
- Lighting
- Motors
- Fans
- Exhaust Ductwork
- Doors
- Grates and Pans
- Panels
- Filter Racks
- Insulation
- Hardware
- Spray Booth Accessories
- Other Miscellaneous

Exhaust Fans

Filters

Control Panels

Fluorescent Light Fixtures

Spray Booth Accessories

Approved Replacement Parts and Filters

GFS is also your approved full-line supplier for Parts and Filters for:

- Binks Booths
- DeVilbiss Booths
- JBI Booths & Ovens
- Blu-Surf Systems
- Milbanks Systems
- Other Spray Booth Manufacturers
